ILLUSTRATED
PARTS LIST

**CARRYALL I, CARRYALL II,
CARRYALL II PLUS, AND
CARRYALL VI VEHICLES**

MANUAL NUMBER 1018862-02
PRINT CODE 0696D1008C

USING THE ILLUSTRATED PARTS LIST

WARNING

- THIS MANUAL IS TO BE USED ONLY FOR IDENTIFICATION AND ORDERING OF SERVICE PARTS. BE SURE TO READ AND USE THE MAINTENANCE AND SERVICE MANUAL BEFORE ATTEMPTING ANY VEHICLE REPAIRS.

This manual covers all 1996 Club Car Carryall vehicles.

The manual is divided into 17 sections. Sections 1 through 4 pertain to both gasoline and electric vehicles, sections 5 through 11 pertain to gasoline vehicles only, sections 12 through 15 pertain to electric vehicles only, and sections 16 and 17 pertain to both gasoline and electric vehicles. Note that there are two or three flags on the outside edge of each page. The first flag will contain the section number of which that page is a part. The other flag (or flags) will contain either the letter G or E, signifying that the page pertains to either the gasoline or electric vehicle only, or to both the gasoline and electric vehicles.

Use the Table of Contents to find the sections and pages that contain the parts and assemblies you seek. The Table of Contents lists section titles and numbers, and under them, the individual page titles and numbers to be found in that section. Unless a page title specifies a particular vehicle(s), the page applies to all DS vehicles.

You will also find vehicle models and serial numbers specified within the listings for individual page titles. These model and serial number specifications identify the vehicles on which parts usage as described on a particular page either began or ended. Have the serial number(s) of your vehicle(s) at hand and read the listings carefully when using the table of contents.

Typically, there is a two-page spread for each individual page title in the Table of Contents (however, some titles required several spreads). On the left-hand page is an illustration showing the parts in their relative positions; the parts are each tagged with an item number in a balloon. The right-hand page is the parts list page, and gives the page title at the top, then the item numbers (corresponding to the numbers on the illustration), part descriptions, and quantity of parts used. Some item numbers have more than one part number because several models and/or configurations of a component are represented together on one spread.

Note that a part description may be indented. This indentation corresponds to a parts assembly level indicated by the numbers 1, 2, 3, and 4 at the top left corner of the parts description area of the parts list page. A part that is indented to *level 2* is a component of the *level 1* part (assembly) that it is listed under. A *level 3* part is a component of the *level 2* part that it is listed under, and a *level 4* part is a component of the *level 3* part preceding it. In each case, the part quantity given for a level 2, 3, or 4 part *is the quantity used per next higher level assembly of which it is a component*. A part that is not indented is a *level 1* part. This means that the quantity given is the quantity used per the portion of the vehicle illustrated on that particular spread.
